

Reheating Instructions

Proteins, Rice & Beans

Place covered pan(s) in a preheated 325°F oven for 20 minutes. Remove cover and stir. Re-Cover tightly and return to the oven for an additional 20 minutes. Check the temperature with a thermometer. Food needs to be 165°F. If it is below 165, return it to the oven for an appropriate amount of time until the temperature is 165°F.

Tortillas

Heat a Comal or non-stick skillet. Place the tortillas in an individual layer on the flat surface for 10 seconds – You DO NOT need to add oil. Flip the tortilla and repeat. Place on a plate and wrap in a damp paper towel or a tortilla warmer to keep hot.
